

Student Achievement in Maryland Public Schools by School Level and Whether the Attendance Boundary is Racially Equal

Students in type B schools generally outperform students in type A schools, but the discrepancy between student performance by school type is greater in schools with more racially unequal attendance boundaries as defined by the Urban Institute

Elementary School

Middle School

- Notes
- [1]: Type A schools are on the side of the attendance boundary with more racial minority students, and type B schools are on the side with fewer racial minority students
 - [2]: The number of schools with unequal boundaries is much smaller than with equal boundaries so the y axis scales differ in this visualization
